

189: Will USEC employees who are 2<sup>nd</sup> tier subcontractors under Wastren be eligible for participation in the Multiple Employer Pension Plan and Multiple Employer Welfare Arrangement?

Answer: The DOE is not able to answer the question regarding all of the USEC employees who are 2<sup>nd</sup> tier subcontractors under Wastren as there are different factors under the terms of the plan that affect eligibility for participation in the BJC Multiple Employer Pension Plan (MEPP) and the BJC Multiple Employer Welfare Arrangement (MEWA). However, if an USEC employee currently has the right under the terms and conditions of the BJC MEPP and BJC MEWA to become a participant under specified circumstances and conditions, it was the intent of the DOE that such eligibility rights, not only for USEC employees but all employees similarly situated, be maintained to the extent permissible by law and by the terms and conditions of the respective plans.

190: [Relative to C.1.V.J as revised in Amendment 0002] Please clarify if the infrastructure will be required to provide drug testing to all current onsite personnel and potential new hires (which we interpret as the entire site, i.e., USEC, DOE Support Contractors, Portsmouth Remediation Contractor, etc.), or just employees that will [be] part of the infrastructure services contract?

Answer: The infrastructure contractor will be responsible for the drug testing program for all onsite DOE personnel as well as all DOE contractor and subcontractor personnel excluding USEC. The entire site security portion of the statements of work applies only to the DOE related site security not that of USEC.

191: Page C-20, C-21 and J Attachment B(2) Page 2 of 12, Section C.2.H.1.f and C.2.I.1 Paragraph 2 and J Attachment B(2); Paragraph C.2.H.1.f "Contractor shall conduct inventories of firearms and other protective force equipment" and C.2.I.1 Paragraph 2 "Protective forces, weapons, materials control and accountability, and management of access/control services are excluded from this contract and will be provided by DOE from USEC", and J Attachment B(2) Deliverable 14 "Semi Annual Weapons Inspection": These three clauses appear to conflict.

Answer: USEC has physical custody of government furnished firearms and other protective force equipment. The solicitation's statements of work will be revised to indicate that the infrastructure contractors must complete witness/verify the physical inventories performed by USEC and report on those items.

192: Will plant radios that conform to the new FCC licensed frequencies operated by USEC at the Paducah Site be provided as GFE or will the Infrastructure Contract be responsible for providing them? Bechtel Jacobs Company, LLC and subcontractors are currently in the process of purchasing new radios to conform to the new system that USEC is installing. As the RFP is currently written, plant radios are not addressed as GFE for the Paducah Site.

Answer: Purchased or converted radios meeting the new requirements are DOE property and will be made available for infrastructure contractor use. A listing of the radios will be posted when available.

193: Must offeror submit FOCI questionnaires (SF328) as part of Volume I for subcontractors that will perform <\$1M annually. If yes, must they submit reps and certs as described in L.13(b)(2)?

Answer: FOCI questionnaires must be submitted for any contractor or subcontractor that will require a security clearance in order to perform work under the contract. The dollar value of the subcontract does not impact the necessity for submission of the SF328. In accordance with L.13(b)(2), representations and certifications must be submitted for the "offeror and all joint venture and LLC members as well as all major (over \$1 million per year) subcontractors."
